

# LIFEPAK<sup>®</sup> 1000

Defibrillator

You're ready.

**You can focus on the patient, on the moment,  
on what matters.**

## You're ready. Now.

In EMS, things can change at any moment. You need to be ready for anything, and so does your technology.

The LIFEPAK 1000 defibrillator is designed to be the most powerful basic life support tool available for your emergency medical service (EMS) and the patients you serve. It ensures you have the best equipment to fulfill the commitment you made when you decided to enter this field—to save lives.

### Customize Care for Your Patient

The LIFEPAK 1000 defibrillator platform enables easy customization of settings to meet your protocol needs in the field. You can adjust the device to complement how you work best with the touch of a button. Recent research emphasizes the importance of effective CPR. Our cprMAX™ technology feature gives you flexibility, so you can increase hands-on time with your patient during a save. With cprMAX technology, you can easily change protocols as standards of care change. Equipped with ADAPTIV™ biphasic technology, the LIFEPAK 1000 defibrillator is designed to tailor energy levels to each patient's needs.

### Choose a Rugged and Intuitive Defibrillator

The 1000 is the most rugged defibrillator ever built by Medtronic, and is tested to the highest standards. The nonrechargeable battery can deliver more shocks than any battery currently available (as of August 2005). With the touch of a button you can assess battery readiness at a moment's notice, thanks to a visible and accessible gauge. The advanced battery also performs sophisticated communications directly with the device so you always know the battery's condition.

The LIFEPAK 1000 defibrillator makes delivering advanced therapy very natural and intuitive. It is unmatched in its class for ease of use. With a large intuitive screen, it can display graphics and ECG readings and is easy to see from a distance. The LIFEPAK 1000 defibrillator gives you confidence in your ability to provide focused, fast and effective care when a life depends on your actions. The screen enables the ALS team to quickly assess your patient's rhythm. A manual mode to override AED function is also available.

**You're ready. Always.**

**You'll Have a Resuscitation Platform for Now and the Future**

The LIFEPAK 1000 defibrillator is an advanced platform designed to provide the best resuscitation option now and in the future. Field upgradeable therapies focused on enhancing patient outcomes will continually build on the LIFEPAK 1000 defibrillation platform. You can always be ready to give your patient the most advanced technology available. A LIFEPAK defibrillator backs you with a strong legacy of Medtronic quality and reliability. That's why more hospitals and emergency medical services nationwide trust the LIFEPAK brand. The 1000 is compatible with other Medtronic products, services and data solutions across the full spectrum of care, from the field to the hospital.

**You'll Know Our Experience and Complete Solution are Standing Behind You**

You are hard working and passionate individuals with a commitment to your communities. You deserve to have someone stand behind you with stellar service. Medtronic supports you with an established brand from a company whose commitment to saving lives and serving customers is well known.

Medtronic pioneered defibrillation 50 years ago, and is now the world leader in medical technology. With more than 250,000 BLS defibrillators and 500,000 total external defibrillators in operation worldwide, we have more experience in emergency response therapies than anyone else. The compatibility of Medtronic LIFEPAK defibrillators and data systems used by most BLS and ALS teams promotes faster, better patient care.

It is our hope to significantly reduce the devastating toll that cardiorespiratory events have on families and communities. Our ultimate goal is to "work as one" with responders around the world to save many more lives.

The 1000 is compatible with other Medtronic products, services and data solutions across the full spectrum of care, from the field to the hospital.

Medtronic provides lifelong solutions for people living with chronic disease.  
Every six seconds, a Medtronic product or therapy saves or enhances someone's life.
